

~~So~~ Stuff Happens!

Real life experience of
the array of issues that
can impact PV asset
financial performance

SPI 2014

Certification Workshop, Monday October 20 2014

John Sedgwick, President VDE Americas

Peter Bostock, Vice President, VDE Americas

- VDE Institute
 - 154 year old internationally recognized certification Body
- Fraunhofer ISE
 - “World Class” applied research
- VDE Americas
 - Wholly owned subsidiary of VDE Germany

The VDE logo is the word "VDE" in a large, bold, blue, sans-serif font.

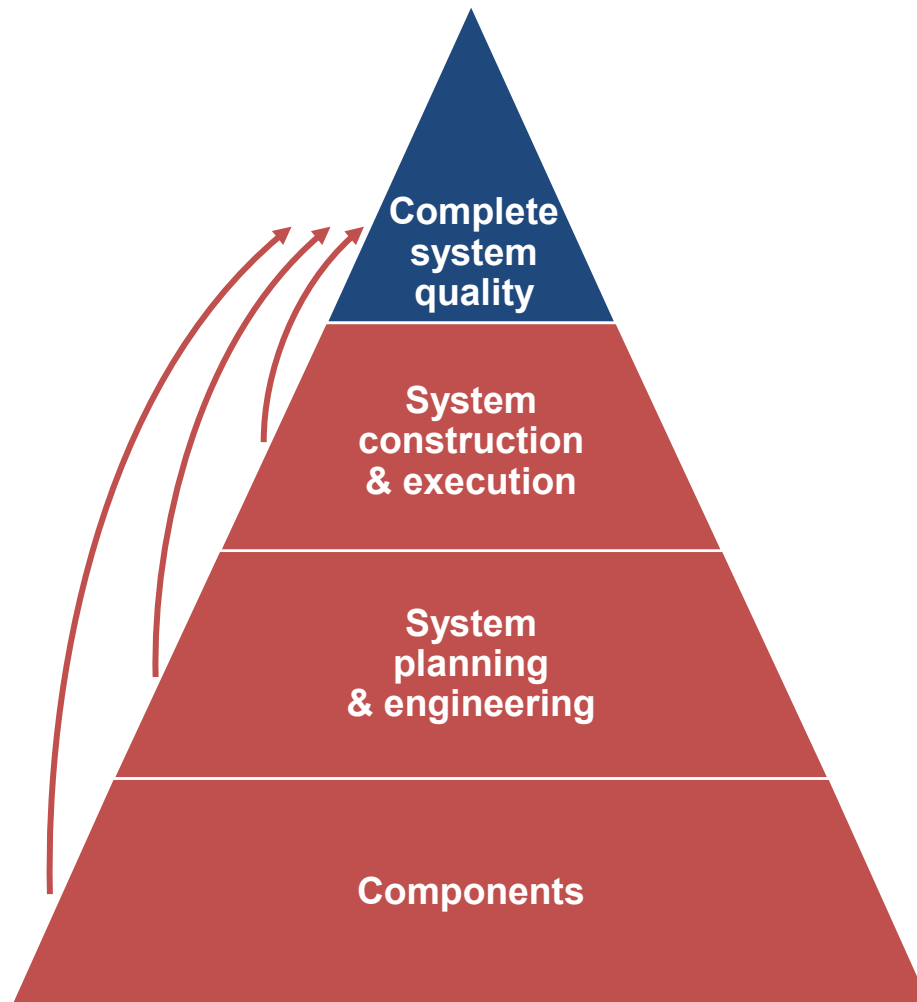

The Fraunhofer ISE logo features a green square icon with white diagonal lines on the left, followed by the word "Fraunhofer" in a large, bold, black, sans-serif font, and "ISE" in a smaller, bold, black, sans-serif font below it.

The VDE AMERICAS logo features the word "VDE" in a large, bold, blue, sans-serif font, with the word "AMERICAS" in a smaller, bold, grey, sans-serif font below it.

30 Years
>38 GW

- Increased uncertainty
- Higher perceived risk
- Redefinition of bankability criteria
- Higher expectations on **overall system quality**

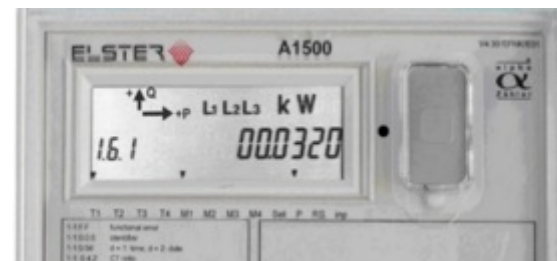

Levelized Costs of Energy

LCOE = _____

Performance Ratio

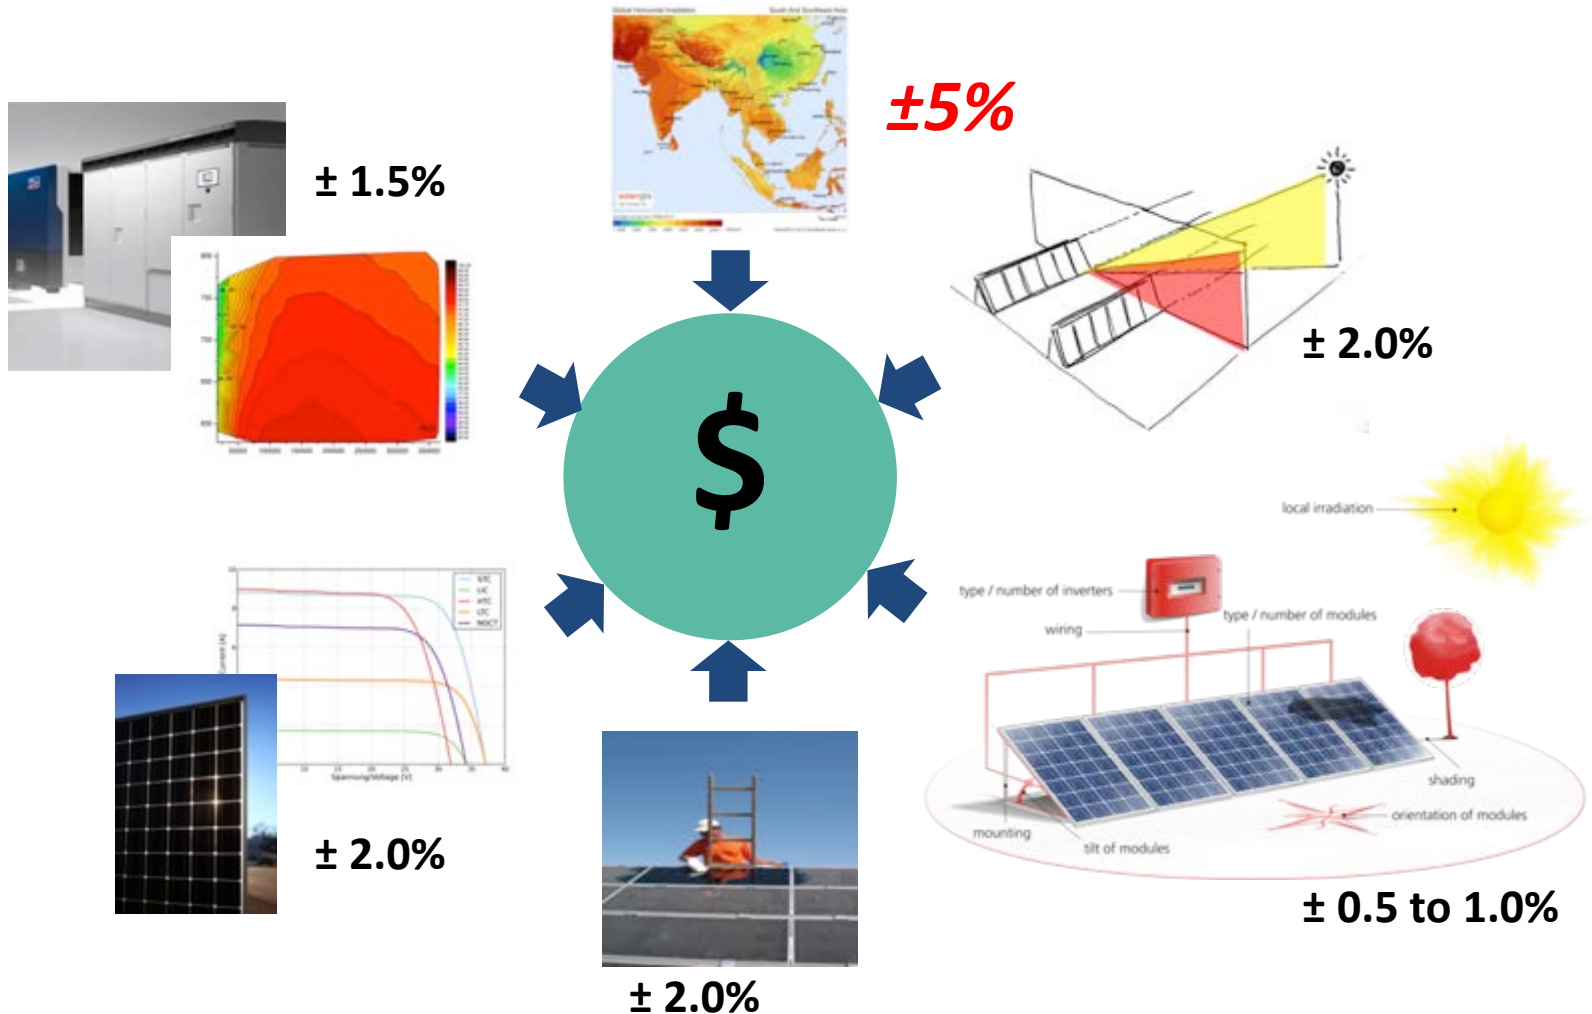

PR = _____

Quality measures for utility scale PV Plants

Input data for yield prediction and typical uncertainties

Manufacturer Data Sheets?

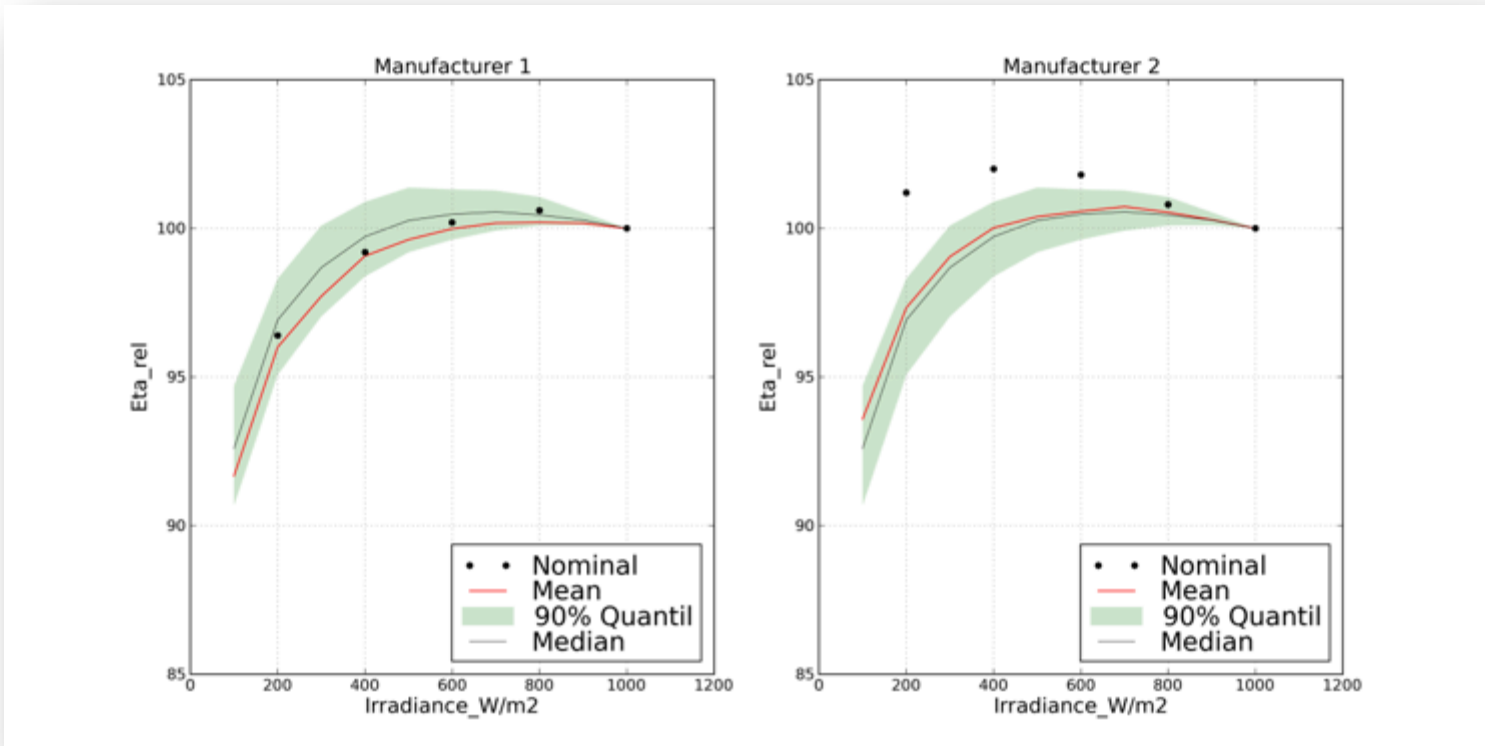

Fig: comparison on manufacturer and laboratory results for irradiance dependence of poly-Si modules

Asset Value Uncertainty

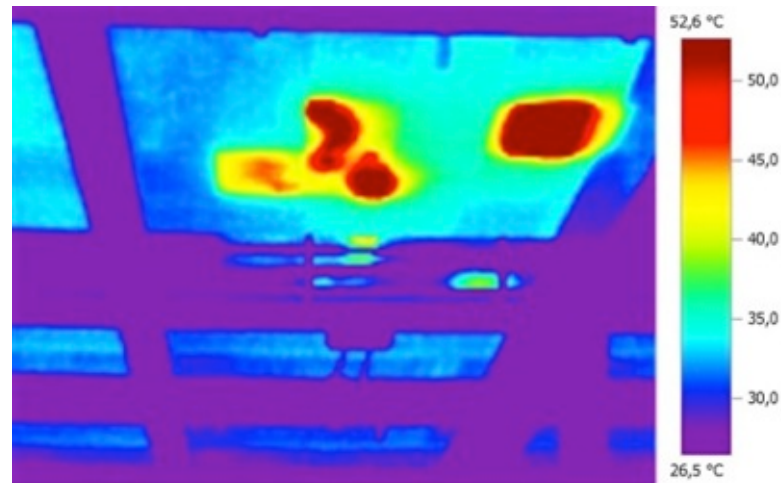

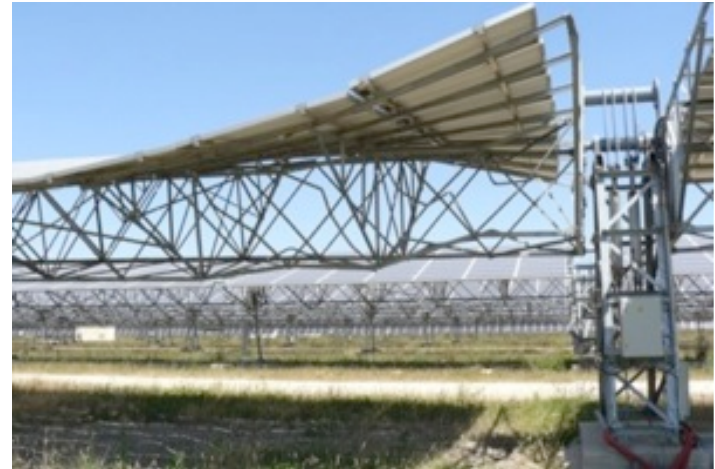

- Max \$
- Minimum uncertainty

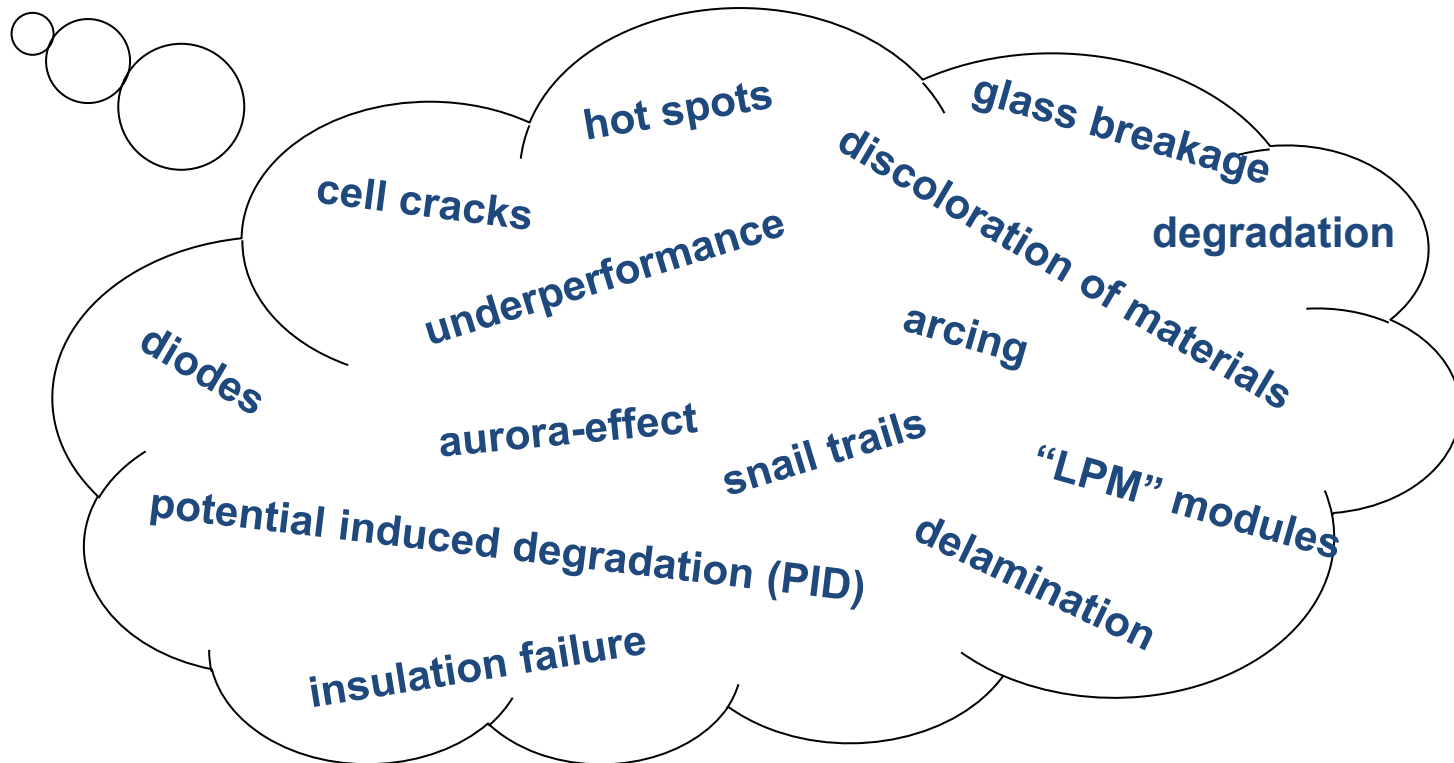

$$2 + 2 = ??$$

Real Life Issues

- Design
- Implementation
- O&M

Known failure mechanisms impacting performance

Implementation

Simple, but critical
and the biggest
offender

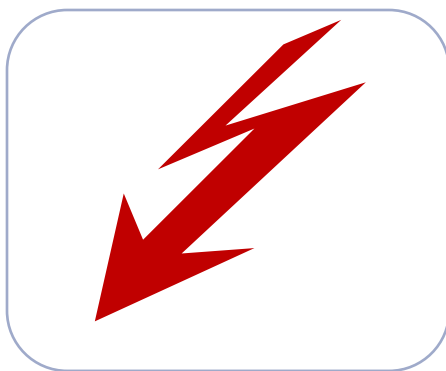

System Issues

- Inverter
- Fire Hazard
- Lightning
- Grounding

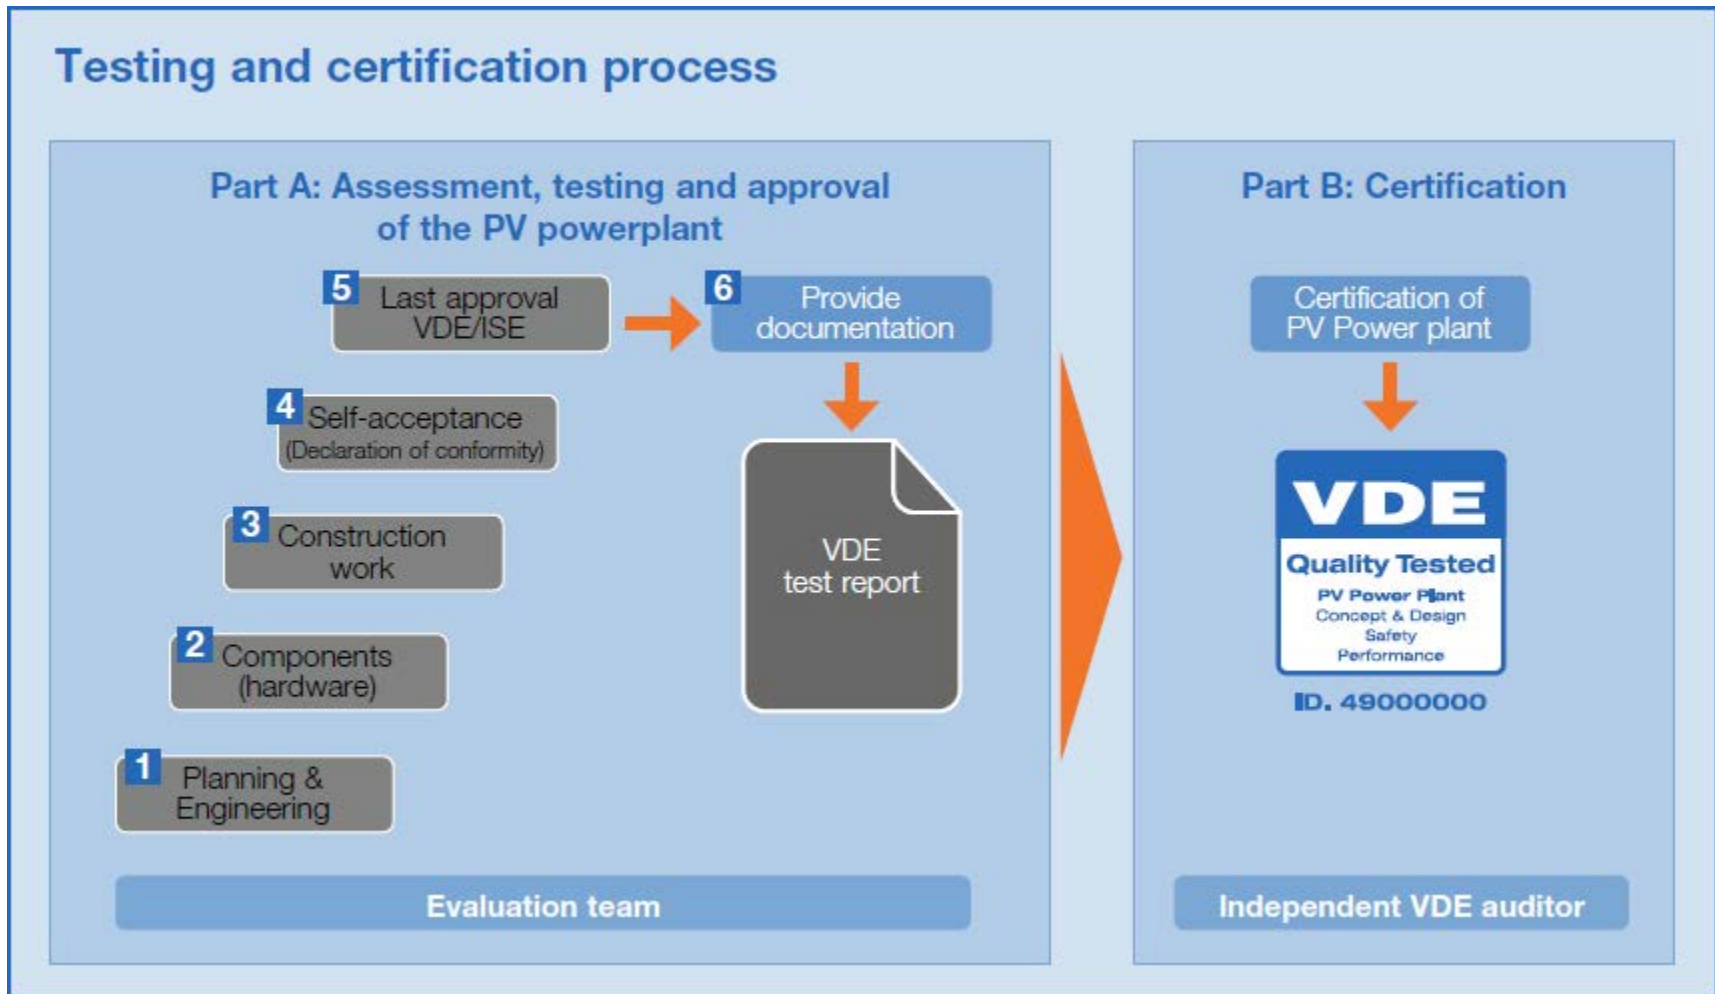

O&M

- Baseline Required
- Certification
 - Procedures
- Cost Effective

Quality Assurance of Large Scale PV Power Plants

New Standard developed by VDE and Fraunhofer

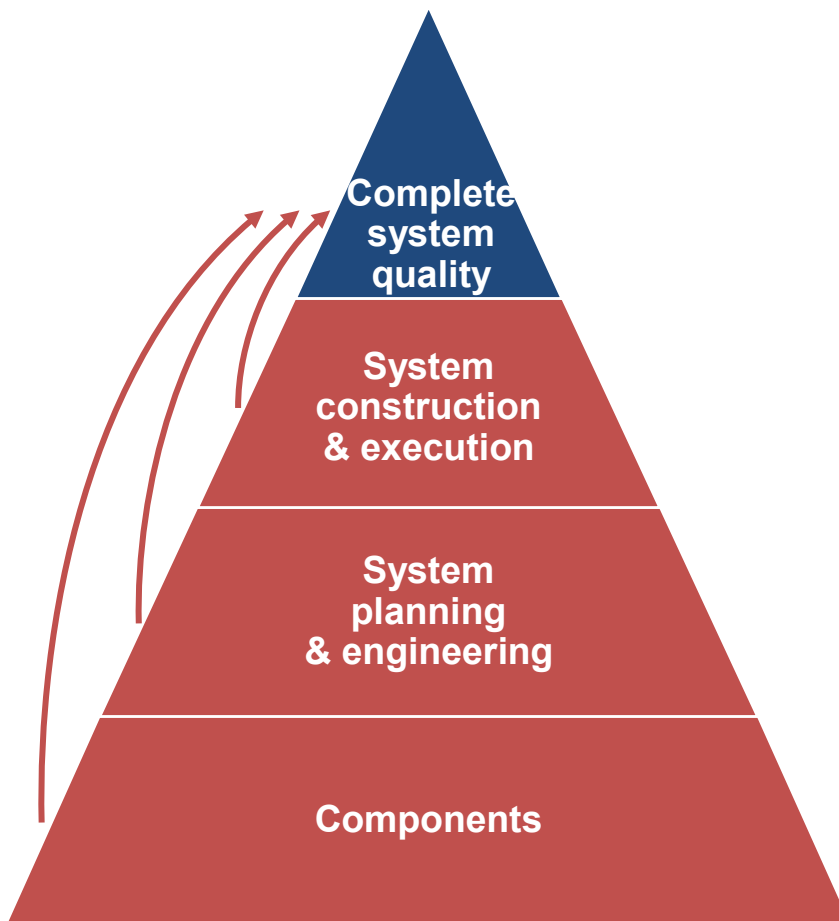

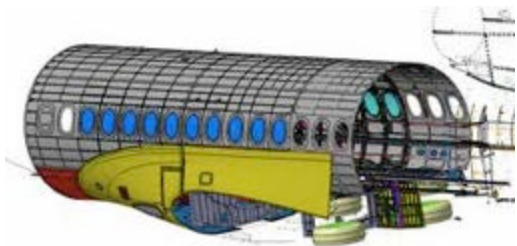

Farnung et. al: Complete PV Power Plant Certification: New Standards for Quality Assurance of Large Scale PV Power Plants, in 40th IEEE Photovoltaic Specialists Conference, Denver, Colorado, USA, 2014

Summary

System-wide certification is a required element of the maturing solar industry
